back end: developed by Janahan Nirmalan's team

Integration Defect Report

Issues while integrating Banking System	Issues while running Banking System	Actions taken to resolve the issues
Backend should accept transactions files folder name as argument so it is easier with scripts		Modified backend to accept folder name as argument
Backend should accept current bank account file & master bank account filenames as argument so it is easier with scripts		Modified backend to accept filenames as argument
For weekly script, Current Bank Accounts File and Master Bank Accounts File for each day should be the ones output from the previous day's Daily run and have to keep old master accounts file to submit		Modified backend to keep old master account file and write to new file.
	Issue with input file which failed to run front end.	Modified input files according to front end input requirements.
